Experience

Skuno Founding Engineer

Nov 2025 to now

Warehouse and retail operations for Microsoft Business Central.

Acumen Consulting Ltd. Senior Software Developer

Dec 2023 to Oct 2025

- Developed Microsoft Business Central extensions in AL.
- Built point-of-sale software in Svelte and Node.js, integrated with Windcave payment terminals.
- Supported customers and maintained internal tooling for work and support ticket management.

City of Troy Parks and Recreation Assistant Manager, Lifeguard

Jul 2018 to Dec 2021

Supervised up to 15 staff per shift, maintained pool chemistry and rescue equipment, and taught swimming to children aged 3 to 12.

Projects

FTA Buddy ftabuddy.com

Field monitor and toolkit for FRC event staff: robot connection timing, match logs, shared checklists, guided troubleshooting, and a support chat built on WPILib, REV and CTRE documentation. Svelte, Bun, tRPC, Postgres.

FRC.Tools frc.tools

Directory of community tools for FRC teams, with event photo albums, practice field map, off-season events, grants, and a robot code and CAD archive.

Audience Display and Fake FMS

Themed big-screen graphics driven live by the FRC field system, used at Rainbow Rumble, WRC and MARC, plus an FMS emulator to test them without a field.

FRC Radio Kiosk KiCad, STM32

Power board for the event radio programming station. v2: 4-layer board with 802.3at PoE detection, passive 12 V fallback, and CR123A backup to ride through supply drops during firmware updates.

Volunteer

FIRST Robotics Competition FTA Assistant, Mentor

Keep FRC events on schedule by diagnosing field and robot faults between matches, and help teams get back on the field. As a mentor, teach design, physics, programming and shop safety.

Education

Oakland University Mechatronics and Robotics Engineering

In progress

Oxford Virtual Academy

Class of 2021

Skills

TypeScript, Svelte, React, Node.js, Bun, tRPC, Microsoft AL, Postgres, SQLite, Python, Java, Docker, Linux, KiCad, STM32, CAD, circuit analysis
